

Multi Dynamic Tax for Magento 2:

Now integrate Shipping tax solution in Magento 2 Marketplace and calculate tax accurately. The store admin and marketplace sellers can multi-custom tax generate using Shipping tax modules .

They decide the Shipping Tax in Fixed and percentage per product while creating it.

E-commerce Marketplace Shipping Tax Extension Features :

- The admin can enable the module for the seller.
- User friendly interface.
- The admin can create multi-dynamic tax
- multi-dynamic tax will display at the shopping cart page and checkout cart page.

Shipping Tax Extension Installation

Customers will get a zip folder and they have to extract the contents of this zip folder on their system.

Customer has Copy the folder ShippingTax module and vendor name Sprinix to **source/app/code/Sprinix** directory of Shopware6. As shown in the below image

First command:

```
php bin/magento setup:upgrade
```

Second command:

```
php bin/magento setup:di:compile
```

Third command:

```
php bin/magento setup:static-content:deploy
```

After running the commands, you have to flush the cache from Adobe Commerce admin panel by navigating through->**System->Cache management**

Flush Cache Storage Flush Magento Cache

✓ The Magento cache storage has been flushed.

Multi-Lingual Configuration :-

For Multilingual support, please navigate to **Store>Configuration>Sales>Subcharge Fee**

The screenshot shows the 'Configuration' page with a sidebar on the left containing icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Student Manager, Students, and Reports. The main content area is titled 'Configuration' and has a search icon, a notification bell with '2', and a user profile 'akash'. Below the title bar, there's a 'Scope' dropdown set to 'Default Config' and a 'Save Config' button. The left sidebar lists categories: GENERAL, CATALOG, SECURITY, CUSTOMERS, SALES, and Subcharge Fee (highlighted). The 'SALES' category is expanded, showing 'Subcharge Fee' and 'Sales'. The 'Subcharge Fee' section is active, displaying a 'Create Multi Taxes' form. The form has an 'Enabled' dropdown set to 'Yes' and a checkbox for 'Use system value'. Below this is a table with columns: label, Price, FeeType, and Action. The table is currently empty, and there is an 'Add' button below it.

Multi Tax General Setting

Enable – Set this field as Yes to enable the extension and No to disable.

Add – To add a new taxes, then click on the Add button.

This screenshot is similar to the previous one, but the 'Subcharge Fee' section now contains a new tax entry. The table has one row with the following values: 'label' (empty), 'Price' (empty), 'FeeType' (set to 'Perc'), and 'Action' (trash icon). The 'Add' button is still present below the table.

Here you have to fill the options.

Label - Enter the tax name.

Price – Enter the tax price.

FeeType – Select the tax type **Fixed/Percentage**.

Action – remove tax
